Work Experience and Projects

Jan 2024 to Mar 2024

Training on Website Design & Development Course | Apponix Academy, Bangalore| 3 Months
Course Topics Covered:
- **HTML5**: Mastery of structuring web pages with the latest HTML standards.

- **CSS2 & CSS3**: Advanced styling techniques including animations and responsive design.
- **JavaScript**: Proficiency in client-side scripting for interactive web experiences.
- **Bootstrap**: Utilization of Bootstrap framework for rapid and responsive website development.
- **jQuery**: Implementation of jQuery library for simplified DOM manipulation and event handling.
- **PHP**: Understanding server-side scripting for dynamic web content generation.
- **MySQL**: Database design and querying using MySQL for backend data management.

Restaurant Online Website:
- Developed a comprehensive online platform for restaurant management using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented features such as online ordering, menu management, reservation system, and customer feedback.
- Ensured responsive design for seamless access across various devices.

Online Teaching Portal:
- Designed and developed an interactive online teaching portal integrating blogging, course management, and e-commerce functionalities.
- Created user-friendly interfaces for course enrollment, content delivery, and payment processing.
- Incorporated features like user authentication, blog creation, course creation, and e-commerce integration for selling courses and educational materials.
- These projects demonstrate a practical application of website development skills to create functional and user-centric web solutions for different domains, undertaken at Apponix Academy, Bangalore.

May 2023 to Dec 2023

APW Private Limited | Dubai | Financial Consultant & IT Administrator
- Worked as a Financial Consultant & IT Administrator
- Managed website content updates, ensuring accuracy and timeliness.
- Provided customer assistance in mortgage document preparation, ensuring compliance and efficiency.
- Oversaw comprehensive document management within the office environment, ensuring organization and accessibility.

July 2022

MCA Final Year Project | Project Creator | Online Restaurant Management System
- Developed an Online Restaurant Management System Project during my final year of college.
- Implemented an intuitive interface enabling customers to place orders seamlessly through an interactive menu.
- Utilized Angular (HTML, CSS, JavaScript) for the frontend, while employing MySQL, Java, and Spring Boot for backend development.

July 2021	**MCA First Year Project	Project Creator	Data Mining**
	• For the first year of college, I worked on a Data mining Project where I took a data set, ran a model to draw different outputs to analyze and understand the data pattern
Mar 2020	**BSc-IT Final Year 4 months Internship	TATA Steel	Web Designing of SNTI TEST-HUB**
	• I have designed a website page using wireframing and prototypes. • It was made using UX Design, I have learned many new things such as how a page retrieves data, etc.
Jun 2015 - Jun 2018	**BSc-IT Second Year Project	Project Creator	Hotel Management System**
	• Made this project during the second year of college using HTML, CSS, and Java Scripts. Designed the frontend part (such as the Home Page, receptionist page, room service page, and catering service page)

Personal Skills

- **Team Player** – I am a very good team player. During my last bachelor's, we organized a college fest and we were able to deliver an exceptional event with proper coordination. I was part of the painting organizer group
- **Teaching/Mentoring** – For the last 8 years I have been teaching a few students. I believe in self-dependent philosophy and have been teaching and mentoring students.
- **Good Listener** – I believe I am a good listener. I listen to people around me; it helps me build trust with the person and I believe when I listen to someone, I build habits of understanding someone's point of view.
